

# SAFE APP

BECAUSE WE CARE !

SAFE APP

**Travel safe from source to destination**

# WHY SAFE APP?

- Tempe is a **student town** and many students commute by their **Bikes** or they just **walk**.
- We keep hearing about the **crimes** happening around the town and that is why we have decided to build an app on **public safety**.

# THINGS USED TO MAKE SAFE APP:

- **Phoenix Crime data set** which consists information about when, where and what crime has happened.
- **Arc-GIS API's, Arc-GIS SDK, Arc-GIS web appbuilder.**
- A bit of **motivation** and help from **mentors.**

# ARC-GIS ??...WHAT IS THAT??

Aeronautical Reconnaissance Coverage Geographic Information System **developed** by **Esri**.

- It is used for **creating** and **using maps**, compiling geographic data, **analyzing mapped information**, using **maps** and **geographic information** in a range of applications, and managing geographic information in a **database**.

# %% (USE CASE) %%

- Epidemic Virus control.
- Route planning for Trucks.
- Car-free day planning in your neighborhood.
- Temporary Traffic Control at a Traffic Incident Management Area.

# CONCLUSION!

- Very useful to student and public to help their commute safe in the city.
- Great feature that can supplement Google maps.
- Arc-GIS is a great tool if you want to do something cool with maps.
